

The new wordnet.dk/dannet

D_anN_et

The screenshot shows the web application interface for wordnet.dk/dannet. The browser address bar shows 'localhost:3456/dannet/data/synset-7918'. The main content area displays a concept entry for 'ORD' (lexical concept) with its definition: 'sproglig enhed som har en betydning, og som udtale...'. Below this, there is a section for 'SEMANTIC RELATIONS' with a 'Display as' dropdown set to 'table'. The table lists various semantic relations such as 'also', 'domain topic', 'eq synonym', 'holonym member', 'holonym part', and 'hypernym', each with a list of related concepts and their linguistic forms.

```
SELECT DISTINCT ?slang
WHERE {
    ?sense lexinfo:register      lexinfo:slangRegister .
    ?word  ontalex:sense        ?sense ;
           ontalex:canonicalForm ?form .
    ?form  ontalex:writtenRep    ?slang .
}
```
